

Experience the revolution.

With a little practice, driving the Solo becomes second nature.

We've gone wireless so that you can use your favorite off the shelf handle and tow rope. A "clamshell" with the controls clamps on to the center of the handle and communicates to a small device the size of a matchbook that's embedded in your life vest. This device communicates to the boat wirelessly. This will also act as a wireless safety lanyard (when the handle is more than 40" from the vest, the engine will not run). The life vest pod also features GPS and remote retrieval; if you fall, the boat will track back to you at an idle speed.

Our new technology and new patents have brought about many significant design changes that allow us to introduce a new upscale version.

Solo was developed following decades of research and engineering to bring you the safest, most high performance ski machine possible.

The gutsy 150 HP 4 Stroke Engine powers you up for any kind of skiing you like, even wakeboarding, barefooting or hydrofoiling.

And you can enjoy your time on the water without worry. Solo is fully EPA compliant and meets all appropriate noise and safety regulations.

Say Hello to Solo.

The most amazing personal watercraft on the face of the planet. The perfect solution for no-show drivers. Now you have the destiny to go it alone.

For years, self-service water skiing and wake boarding has been only a dream. The desire for the power and control to be the driver, spotter and skier is now a reality. Solo is your own personal ski machine. Always ready whenever you are.

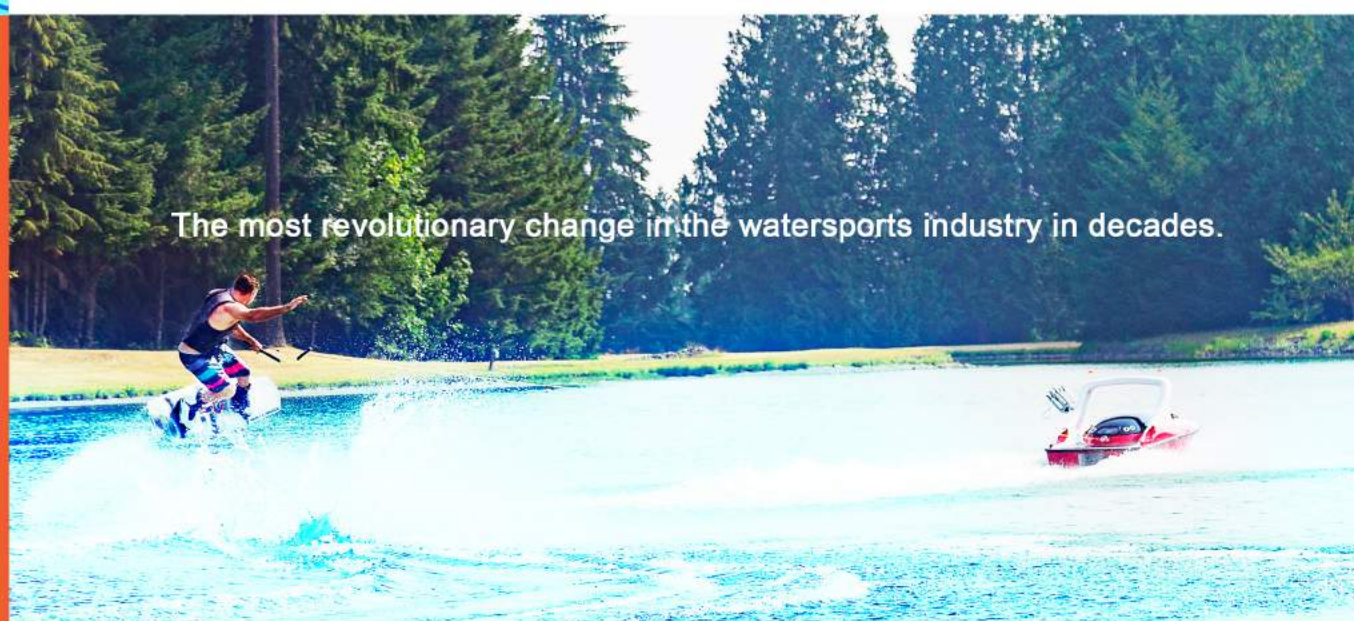

Smiles Guaranteed.

Whether you're a champion slalom skier or a beginning wakeboarder, Solo will definitely put a smile on your face. From family fun on inner tubes, to wakeboarding, barefooting, or hydrofoiling, this will be the most fun you've had on the water in years.

And Solo attracts a crowd. Don't be surprised if you get a lot of second glances, or the neighbors suddenly become your best friends.

Make it your toy, or make it your workhorse, Solo *is* the freedom you've been waiting for.

The Power to Perform.

This 150 HP 4 Stroke engine can tear up the water like no other. Speed, torque and EPA compliance all in an engine more quiet than most conventional engines. It's so powerful and reliable, you could close your eyes and imagine there's a tournament boat right in front of you. It's truly amazing.

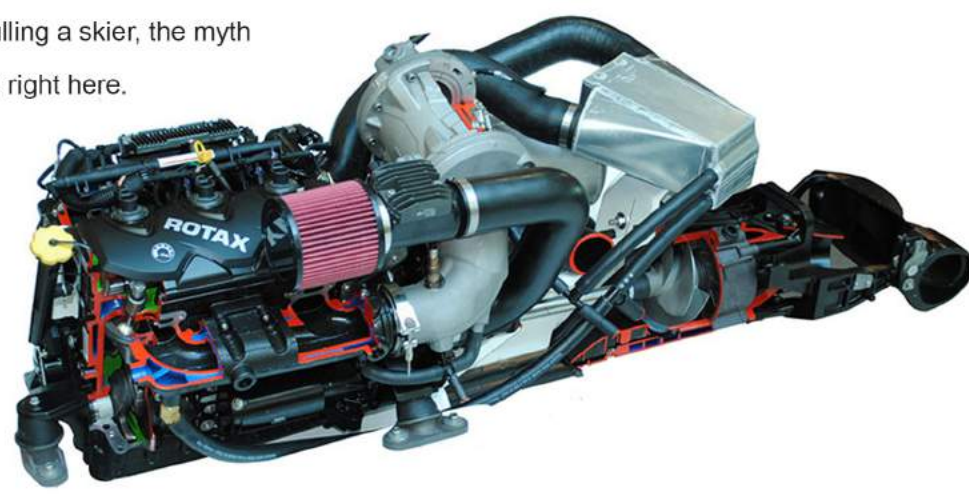

No matter how you ski, Solo will pull you. In more ways than one.

Solo Specifications

Material: Fiberglass/Composite & Molded Plastic
Length: 94.5"
Width: 47.5"
Height: 29"
Weight: 675 lbs.

Engine Model: Rotax (R) 4-TEC 150 ECT
Engine Type: 3 cylinder, 4 stroke
Displacement: 1,494 cc
Rated Power: 150 hp
Propulsion: Jet Pump: Axial Flow, Single Stage
Automatic Bilge: Constant Siphon
Fuel Management: Electronic Fuel Injection (EFI)
Fuel Capacity: 8 U.S. Gallon
